

# UNIVERGE SV9100 BLUE

## Phone Solution

### Simple, Reliable, Secure

Need a modern business phone solution without a major upfront investment, but not ready for the cloud?

The NEC SV9100 BLUE system is a complete out-of-the-box, on-premises business phone solution. With a reputation for reliability and security, the SV9100 BLUE is ideal for the small or medium-sized business in need of telephony applications like Unified Messaging, Voicemail and the latest Mobility features. What separates the SV9100 BLUE from other premise-based systems is a single monthly bill determined by the number of subscribers. All SIP Trunk services are included in the monthly subscriber cost.

### Minimal Investment Required

The SV9100 BLUE is an opportunity to deploy a premise-based system as an operating expense, eliminating the need for a large upfront investment. Pay only for the capacity you need with a single monthly bill for system hardware, phones and phone services.

### At a Glance

- Low upfront cost
- Complete subscription based, out-of-the-box solution includes all system hardware, phones and SIP trunks
- Support for IP extensions, Bring Your Own Device (BYOD) mobility endpoints and analog gateways
